PharmLabs San Diego Certificate of Analysis

3421 Hancock St, Second Floor, San Diego, CA 92110 | License: C8-0000098-LIC ISO/IEC 17025:2017 Certification L17-427-1 | Accreditation #85368

Laboratory note: The estimated concentration of the unknown peak in the sample is 56.42 mg/g | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)08-THC or 09-THC. At this time there are no reference standards available for (+)08-THC (+)08-THC is a different compound from the main (+)08-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)08-THC and 09-THC and 09-THC is a different efficacies. Using the most advanced instruments and techniques available, the separation of (+)08-THC and 09-THC and 09-THC with the majority, if not all, of the concentration being (+)08-THC. Total d8-THC is a product of the separation of (+)08-THC and 09-THC with the majority, if not all, of the concentration being (+)08-THC. Total d8-THC is a production of (+)08-THC and 09-THC with the majority, if not all, of the concentration being (+)08-THC. Total d8-THC is a production of (+)08-THC and 09-THC with the majority, if not all, of the concentration being (+)08-THC. Total d8-THC is a production of (+)08-THC and 09-THC with the majority if not all, of the concentration being (+)08-THC. Total d8-THC is a production of (+)08-THC and 09-THC with the majority if not all, of the concentration being (+)08-THC.
